

Odd Poster Listing

Thaise Pinto de Melo

Agreement among gwas results from different statistical methods as a strategy to increase the power of qtl detection *abs# 97*

Saleh Shahinfar

Early prediction of important adult wool traits *abs# 99*

Andrew Foote

Defining environmental stress conditions that produce differential survival in black tiger shrimp, *penaeus monodon abs# 101*

Mehar S Khatkar

Comparison of different breeding design options for long term genetic gain and diversity in aquaculture species *abs# 103*

Matt Wolcott

Preputial eversion in young, tropically adapted bulls is a useful genetic indicator trait for improving female reproduction *abs# 105*

Cheryl Quinton

Effects of Irish beef indexes and breeding programs on greenhouse gas emissions *abs# 107*

Lucy W Coleman

Breed variation in tongue colour of dairy and beef-cross-dairy calves *abs# 109*

Hawladar A. Al-Mamun

Genetic and phenotypic correlations between various growth and carcass traits with primal cut meat yield traits in Hanwoo cattle *abs# 111*

Lucia G Albuquerque

Genotyping of nellore biopsied embryos *abs# 113*

Carel Muller

Preliminary estimates of productive lifetime and lifetime efficiency in holstein cows as affected by age at first calving *abs# 115*

Carel Muller

Productive lifetime and lifetime efficiency in holstein cows as affected by first lactation milk yield *abs# 117*

Fernanda M Rezende

Georeferenced evaluation of genetic patterns of montana tropical® cattle *abs# 119*

Tingting Wang

The use of mid-infrared spectrometry and high-density genomic information to predict milk fatty acids, energy balance, and methane emission for Australian dairy cows *abs# 121*

Odd Poster Listing

Matthew D Price

Genetic parameters of puberty estimated using two genetically divergent groups of holstein-friesian dairy heifers *abs# 123*

Evgeny Glazov

Next Generation Tools for Molecular Breeding and Genomics Selection *abs# 125*

Roger Huerlimann

Multi-assembler pipeline for the de novo transcriptome assembly of non-model organisms: the case of the black tiger prawn (*Penaeus monodon*) *abs# 127*

Susanne Hermes

A genetic exploration of Australian Large White pigs *abs# 129*

Sam F Walkom

Genetic variation of weaner survival in merino sheep and its relationships with growth and wool *abs# 131*

Schalk Cloete

Genetic responses in component and composite reproduction traits in Merino ewes divergently selected for number of lambs weaned *abs# 133*

Jasper Cloete

Genetic parameters for arena behaviour of lambs from merinos divergently selected for lambs weaned per ewe mated *abs# 135*

Juncong Yan

A genome-wide scan of positive selection signature using ovine infinium[®] hd snp beadchip in two romney lines, selected for resistance or resilience to nematodes *abs# 137*

Nasir Moghaddar

Accounting for population structure in genomic prediction of Australian merino sheep *abs# 139*

Sonja Dominik

The effect of including immune competence in merino sheep breeding programs *abs# 141*
